Summary

Recently completed MS degree in Data Science, with a focus on health/medical data and statistics using R and Python. Experienced in laboratory oncology cytogenetics in a healthcare setting with a strong background in molecular biology. Leveraging organization, attention to detail, and prioritization skills from a laboratory background and especially interested in cancer biology, epigenetics, personalized medicine, and using machine learning in laboratory workflows. Seeking to contribute these interests and computational methods to genomics data in a collaborative role.

Skills

Python | R | SAS | SQL | Git/GitHub | Javascript | Linux | Microsoft Office | Data Visualization | Cancer Biology
Time management | Attention to detail | Problem solving | Empathy | Teamwork | Adaptability | Communication | Leadership

Education

MS in Data Science | Ball State University

Certificate in Full Stack Web Development | The Ohio State University

BS in Cytogenetics | University of Texas Health Science Center in San Antonio

BS in Genetics & Psychology | Texas A&M University

Professional Experience

Balanced Family Academy - Clintonville

Columbus, OH

Teacher

Oct 2021 - Present

- Facilitated scheduled classroom learning activities for children ages 0-5, modeled and **taught social skills daily**
- Responsible for parent communication, monitoring classroom environment for safety, and **training new hires**
- **Received "Impact Player of the Month"** for reliability and positive attitude

Ohio State University Wexner Medical Center

Columbus, OH

Cytogenetics Lab Technologist

Jul 2011 - Jul 2021

- Performed cell culturing, cell-cycle manipulation, DNA-tagging, and fluorescent and brightfield microscopy
- Analyzed chromosome banding patterns, routinely **exceeding the average productivity by 15%**
- **Collaboratively improved workflow efficiency**, written procedures, and a new hire training plan
- **Solved daily wet lab quality issues**, communicated stat results, and tracked reagent inventory using MS Excel

Projects

Teen Mental Health and Smartphone Use | [Report](#) | [Video Presentation](#)

- Analyzed dataset from Kaggle with visualizations, statistics, correlations, multiple linear regression, and ANOVA
- Interpreted results and presented findings in both written and video formats

Relationship Between Crime and Unemployment | [Report](#)

- Using EDA and RStudio, combined data from multiple public sources and reported on insights gathered
- Designed plots to visualize numerical data and variable relationships

Bacterial Outbreak Investigation | [Presentation](#)

- Identified clonal strains using web-based bioinformatics tools and presented findings on antimicrobial resistance
